Check List:

- ✓ Send your order before April 15th, 2017 to reserve your desired species!
- ✓ Double check your math
- ✓ Make sure you added the Handling Charge of \$3.00
- ✓ Print clearly your complete Name, Mailing Address, Day Time Phone Number.
- ✓ Enclose your check or credit card information for payment
- ✓ Mark your calendar with pickup dates and times!

2017 Species Descriptions & Site Suitability

No.	Species	Mature Height	Description	Soil	Light	Uses
1	American Plane Tree <i>Platanus occidentalis</i>	75'	Rugged tree, fast growing. Trunk is white-cream, and olive-green interior bark is exposed on an annual basis as the tan-gray exterior bark exfoliates in rolled-up tube-like sheets every mid-Summer.	Tolerates wet and compacted soils	Partial sun to full sun	Awesome shade tree! Timber, wildlife food & cover.
2	Black Cherry <i>Prunus serotina</i>	75'	Dense foliage, white flowers appear in May, yellow to red color in Fall, resistant to walnut toxicity.	Well drained soils	Full sun to partial shade	Timber, firewood, ornamental, wildlife food & cover
3	Chinese Chestnut <i>Castanea mollissima</i>	60'	Very striking tree, leaves turn yellow/bronze in Fall. Edible tasty nuts.	Very tolerant of soil conditions, except for wetland	Full sun to partial shade	Chestnut are a good source for wildlife food!
4	Hazel Nut <i>Corylus americana</i>	12'	Hardy shrub, can be trimmed and molded to shape or space you prefer. Fast growing!	Sandy, clay, loam - widely adaptable!	Full sun to partial shade	Edible nuts for humans & wildlife. Preferred by: squirrels, deer, turkey, pheasants, ruffed grouse.
5	Pin Oak <i>Quercus palustris</i>	70'	Delightful shades of red & crimson red, rapid growing tree!	Moist wet soils, they love the swamp!	Full sun	Food source for numerous birds & animals, timber
6	Red Oak <i>Quercus rubra</i>	75'	Brilliant Fall foliage, fast growing.	Well drained soils	Full sun to partial shade	Wildlife food, timber
7	River Birch <i>Betula nigra</i>	90'	Excellent tree for low swampy areas, tolerates standing water for several weeks at a time. Extremely heat tolerant. Fall color is yellow. Fast growing.	Wet soils Adapts well to heavy clay and poor drainage.	Full sun to partial sun	Shade tree
8	Sugar Maple <i>Acer saccharum</i>	75'	New York State Tree. Producer of maple syrup. Favorite street tree, and nice shade tree. Fairly fast growing.	Grows on wide variety of soils	Full sun to partial shade	Street or shade tree, firewood, timber, maple syrup
9	White Oak <i>Quercus alba</i>	85'	Wonderful shade tree, excellent wildlife food!	Thrives on many soil types but prefers deep moist, well drained	Full sun to partial shade	Shade tree, timber, wildlife food!
10	Fraser Fir <i>Abies fraseri</i>	70'	Tall fir tree with short dark-green needles with silver undersides. Its compact, pyramidal, shape, has long lasting aroma. Has soft needles and strong branches.	Well drained soils	Full sun to partial shade	Christmas tree or ornamental
11	Blue Spruce <i>Picea pungens</i> var. <i>glauca</i>	75'	Stiff, silvery-blue green needles prickly to touch, "King of the ornamentals" dense colorful screens.	Ordinary soil, average moisture	Full sun to partial shade	Screen, windbreaks, provides wildlife cover
12	Concolor Fir <i>Abies concolor</i>	130'	Has good foliage color, good needle retention, pleasing shape and aroma.	moist loamy soils	Full sun to partial shade	Wildlife food & cover pulpwood, lumber, furniture
13	Norway Spruce <i>Picea abies</i>	80'	Graceful very attractive, drooping branches, resistant to walnut toxicity.	Thrives well in average soil conditions	Full sun to partial shade	Christmas trees, windbreaks, wildlife food & cover
14	White Cedar <i>Thuja occidentalis</i>	40'	Growth is pyramidal and well suited for windbreaks, good wetland plant.	Grows in ordinary soils, does well in swampy areas	Full sun to partial shade	Wildlife food & cover, good wetland plant, hedge

No.	Species	Mature Height	Description	Soil	Light	Uses
15	White Pine <i>Pinus strobus L.</i>	80'	Soft long needles, Frequently used for windbreaks.	Grows on nearly all soil types	Full sun to partial shade	Wildlife food & cover, windbreaks & screen
16	Caladium Assortment <i>Araceae</i>	12-18"	Fancy long leafed with colored midribs and contrasting backgrounds and borders, many uses in landscape. Bloom time Summer. Easy to grow.	Well drained soil	Full sun to partial shade	Contrasting backgrounds & borders, can be used as a house plant
17	Canna Assortment <i>Cannaceae</i>	3-6'	Exotic looking plants are indispensable splendid Summer border bursting with drama. Bloom time July - October.	Needs plenty of water	Full sun	Great centerpiece in bedding schemes & large containers.
18	Clematis Assortment <i>Ranunculaceae</i>	8-12"	Perennial vine growing flowers. Bloom time May-September.	Well drained soils	Full sun to partial shade	Cover rocky sites, trellis posts, fences, will need support.
19	Dahlia Assortment <i>Fabaceae</i>	35-40"	Perennial flowers, large dinner size blooms! Bloom time mid Summer. Easy to grow.	Well drained soil	Full sun to partial shade	Long lasting cut flowers
20	Gladiolus Assortment <i>Plural gladioli</i>	30-40"	Elegant flower, great cut flower, tall, impressive flower spikes. Bloom time July - September.	Well drained soil	Full sun	Flower arrangements, lasting a week or more in vase.
21	Peony Assortment <i>Paeonia lactiflora</i>	36-40"	Extremely long lived, hardy, shrub-like plant, showy double flowers. Bloom time Mid Spring. Easily grown.	Well drained soils	Full sun	Border, accent, along fences, driveways
22	Bartlett Pear Tree <i>Pyrus communis</i>	18'	Fast Growing semi dwarf pear tree, adapts well to urban pollution, A large, heavy-bearing pear variety. Fruit ripens in late August. Don't need to have other trees for cross pollination. Fast Growing!	Widely adaptable to most soils	Fun Sun	Human & wildlife food, keeps well in storage
23	Blueberries Northland <i>Vaccinium corymbosum</i>	6'	Flexible branches which don't break under heavy snow loads, adapts well in sub-zero climate. Flowers provide nectar for native bees, butterflies and other pollinators.	Acidic soil	Full sun to partial shade	Human & wildlife food
24	Honeycrisp Apple Tree <i>Malus domestica</i>	18'	Semi dwarf apple tree, early Spring blooms of white to blush pink blossoms, sweet-tart, crisp, juicy flavor, delicious fruit. It's best to plant additional apple trees nearby to promote pollination! Harvest early September. Easy to grow!	Well drained soils	Full sun	Human & wildlife food
25	McIntosh Apple Tree <i>Malus 'McIntosh'</i>	18'	Semi dwarf apple tree, early delicate apple blossoms in April, Fruit is light, tangy flavor, heavy producer mid September. Easy to grow!	Well drained soils	Full sun	Human & wildlife food
26	Red Raspberries Heritage <i>Rubus ideaus 'heritage'</i>	5'	Ever bearing variety that produces two berry harvests during the growing season. Luscious juice and sweet fruit, high yield, self pollinating.	Thrives in most soil types	Full sun	Human & wildlife food
27	Strawberries Honeoye <i>Fragaria x ananassa honeoye</i>	1'	Tastiest Strawberries ever! Sweet as Honey, June bearing variety, good for freezing, with a 2 week harvest period.	Well drained soil	Full sun	Human food, ground cover.

No.	Species	Mature Height	Description	Soil	Light	Uses
28	American Elderberry <i>Sambucus canadensis</i>	12'	Large flattened clusters of tiny cream-colored flowers in Summer, fragrant; large clusters of small dark purple berries in late summer.	Widely adaptable to most soils	Full sun to partial shade	food for songbirds & game birds cover for broods of young pheasants & quail, erosion control.
29	Common Lilac <i>Syringa vulgaris</i>	15'	Masses of very aromatic lavender flowers in late Spring, old-fashioned favorite! Resistant to walnut toxicity.	Widely adaptable to most soils	Full sun	Butterfly & hummingbird attraction, screen nesting for songbirds
30	Rose of Sharon <i>Hibiscus syriacus</i>	10'	Flowering shrub. Packet has combination of purple, pink and white with red centers, attractive blossoms. Good for urban conditions.	Tolerant of a wide variety of soils	Full sun to partial shade	Hummingbird attraction
31	Winterberry Holly <i>Olex verticillata</i>	15'	Small white flowers bloom April to July, attractive bright red fruit late Summer.	Widely adaptable to mostsoils	Full sun to partial shade	Wildlife food for small mammals & birds.
A	Arbor Guard	Protects tree trunks from weed trimmers, mower decks and mice. 25% recycled polyethylene wrap around guard expands as the tree grows. Gray tree bark color with ultraviolet inhibitors and will not lose its shape or color hue to sun exposure. Holes in guard are the right size to discourage rodents, yet allow the bark to breathe so rot does not develop.				
B	Bat Box	One brown bat can eat 3,000 to 7,000 mosquitoes a night! Many people think that birds such as the purple martin are the best natural defense against those tiny pests, but they are not! Bats feed when mosquitoes are most active at night. One bat box will hold up to 60 brown bats.				
C	Bluebird Box	Bluebird nesting timetable is from March 15 - June 20. The more nesting boxes you put up the more likely you are to get your NEW YORK STATE BIRD, bluebird, in your yard.				
D	Fertilizer Tablets	Benefits: promotes vigorous growth, easy to use. Just put one tablet in planting hole, put some soil over and then plant the tree or shrub. Time released slowly over a two year period.				
E	Organic Compost Tea Bags	Convenient, fast and dose-controlled way to feed plants. No measuring, no waste. Your plants receive the even-feed slow release nutrients over time as needed. Feeds plants up to 4 months. Biodegradable filter pak. Provides single dose applications of sustained organic slow release nitrogen.				
F	Organic Tree Fertilizer Spikes	Most effective way to deliver organic fertilizer to your trees. These spikes are placed in the soil, where microbes will break them down for fast absorption by feeder roots.				
G	Marking Flags	Mark your planting so you don't mow it over! It also helps to remind you where you planted, so that you can keep weeds from taking over the young tree or shrub.				
H	Miller Liqua Gel	Benefits: fewer lost trees, faster growth rate, better moisture retention. If you are not planning on planting your trees within the next couple of days after pickup, we recommend you dipping your tree roots in this gel.				
I	Rain Gauge	Tru-Check. Wherever accurate knowledge of rainfall is important. Great gift for farmers, homeowners, greens keepers, orchardists, hobbyists, contractors and conservationists.				
J	Stake it Straight	Tree support kit includes: 3 100% recycled plastic stakes, three 10ft sections of tree rope, one unique, non-girdling support strap. Help tree grow healthy and straight!				
K	Stump-out	Removes old stumps from cut or wind damaged trees without having to dig. Stump-out makes a stump porous by dissolving the lignin binding between the cellulose layers. Simply drill several holes in the top and sides of stump and fill each hole with Stump-out. You can either burn the stump in four to six weeks or allow it to decompose naturally. Stumps should be seasoned at least one year before use.				
L	Tree Shelters	23" height, Package of 5 tree shelters, includes oak stakes, and nets, protects against animal, wind and weeds.				

Order deadline is April 15th , 2017!
